BİLSEM 2026-2027

3. SINIF BİLSEM SORULARI

ÜCRETSİZ

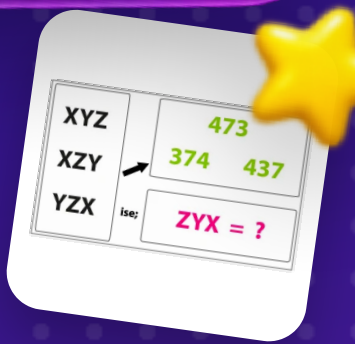

12 SORU ÇÖZÜM VİDEOLU

Tablet sınavında genelde sorulan 12 soru tipinden 12 örnek. Cevap anahtarı, yazılı çözümler ve her sorunun çözüm videosu.

Nasıl kullanılır?

1. Yazdırın; çocuğunuz her soruya bir dakika kadar ayırsın.
2. Cevapları sondaki anahtarla birlikte kontrol edin.
3. Kodu okutun ya da tıklayın: çözüm videosu açılsın.

Ücretsizdir; çoğaltıp paylaşabilirsiniz.

Cevap anahtarı

Yanlış yaptığı soruda önce yazılı çözümü okuyun, sonra videoyu birlikte izleyin.

1.	**Matris**	A	Her satırda yeşil, turuncu ve sarı birer kez var; üçüncü satırda turuncu eksik. Kesik köşe her adımda saat yönünde bir çeyrek dönüyor: sol üst, sağ üst, sonra sağ alt. Boşluğa sağ altı kesik turuncu daire gelir.	Videoyu izle →
2.	**Örüntü**	D	Her adımda bir lacivert üçgen artıyor: 1, 2, 3. Sıradaki kutuda 4 lacivert üçgen olmalı.	Videoyu izle →
3.	**Desen Tamamlama**	D	Boşluğa üstteki büyük hedefin alt kısmı, soldaki küçük hedefin yarısı ve alttaki hedefin üst kenarı düşer. Boşluğa bu üçünü birden taşıyan parça gelir.	Videoyu izle →
4.	**Benzeşim**	C	İlk çiftte resim baş aşağı çevriliyor: üstteki iki altıgen alta, alttaki üste geçiyor; renkler değişmiyor. Aynısı yapılınca tek mavi altıgen alta iner, iki yeşil üstte kalır.	Videoyu izle →
5.	**Küp Sayma**	D	Önce bütün çatıları bulun, arkadaki alçak olanları da. Her kulenin kaç katlı olduğunu toplayınca 10 küp çıkar.	Videoyu izle →
6.	**Küp Döndürme**	B	Üst yüz hep koyu yeşil. Bu kez renkler sağdan sola kayıyor: sağdaki renk bir sonraki küpte sola geçiyor. İlk küpün sağındaki kırmızı ikinci küpte solda, sağda da sarı olmalı.	Videoyu izle →
7.	**Küp Görünüm**	C	Göz soldan bakıyor: yalnız sol yüzler görünür, her sırada en soldaki küp arkasındakini saklar. Yüksek kuleler resimde de yüksek kalır. Sütun sütun renkleri yerleştirince iki yüksek sütunun ortası turkuaz, aralarındaki alçak sütunun üstü sarı olur.	Videoyu izle →
8.	**Şifreleme**	D	XYZ ile XZY ikisi de X ile başlıyor; 473 ile 437 de 4 ile başlıyor: X = 4. Kalan YZX = 374, yani Y = 3, Z = 7. ZYX = 7, 3, 4: 734.	Videoyu izle →
9.	**Yansıma**	C	Aynaya yakın olan kız aynada da aynaya en yakın yerde, yani solda durur. İkisi de ters döner ama el ele kalırlar.	Videoyu izle →
10.	**Gölge**	A	Pembe yerler siyaha döner, beyaz yerler beyaz kalır. Kemerleri tek tek eşleştirin: üst sırada siyah ve beyaz kemerler sırayla dizilir, sağ alttaki bembeyaz kemer gölgede de bembeyaz kalır.	Videoyu izle →
11.	**Figürsel Eşitlik**	B	İki yandan 2 yeşil daire ve 1 üçgen atılınca 1 daire = 2 üçgen kalır. Üçgen, daire, üçgen = 1 + 2 + 1 = 4 üçgen.	Videoyu izle →
12.	**Farklı Olan**	D	Her kutuda bir damla ve bir külah var. Üçünde ikisi de aynı yöne bakıyor; farklı olanda damla sola, külah sağa bakıyor.	Videoyu izle →
